DETAILED ACTION

1. Applicant has submitted Remarks containing evidence of unexpected and superior results along with amended claims dated October 4, 2010 in response to the Final Office Action dated July 21, 2010. These Remarks and the Amendments to the claims overcome the previously cited prior art and place the application in condition for allowance.

Allowable Subject Matter

2. Claims 3-7, 9-11, 15, 19 and 21-23 are allowed.
3. The following is an examiner's statement of reasons for allowance: The closest prior art appears to be Kenbeek (US 6,462,001) which discloses a complex ester used in an automobile engine. However, the ester which is added to an engine as in Kenbeek has a materially different kinematic viscosity (up to 1000 cSt at 100°C) than the claimed ester (1500 to 5000 mm²/s at 100°C) indicating a different degree of esterification and/or different carbon chains. Applicant has submitted evidence of unexpected and superior results when the claimed ester containing composition is added to an engine of the reduction of wear such as cam nose wear and cam lobe wear. As such, the claimed method is not taught or fairly suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
